Proven Quality, Leading Technology

Proven Quality, Leading Technology

This product has changed the direction to repair our roads. This new technique enables to achieve faster results which use to take a much longer time with earlier methods. The product settles with less disorder thus enabling the repair process to be much faster and a quick accessibility of the path.

Feel the compressive and massive load bearing strength of Morsel Road Repair Kits. It is much more substantial and durable then the original material

Morsel Road Repair Kits

Product Grade	Setting Time	Working Conditions	Packing
Morsel 5010	30 minutes	Dry Conditions	17 Kg
5012	2 Hrs.	Dry Conditions	17 Kg
5014	2 Hrs	Wet Surface	17 Kg

Why cannot we rebuild with concrete

Concrete roads with the passage of time develop holes cracks etc due to heavy vehicular movement of heavy loads. These damages to the concrete are impossible to be repaired as the concrete takes up 28 days to dry up completely. If it is put to use before that the surface loses its bonding with the old concrete.

Why Morsel Road Repair Kit

Morsel Road Repair Kit is a special blend of asphaltic polymer adhesives and carefully graded fillers.

Morsel Road Repair Kit will remain in the repaired areas in the same condition as when the initial repair was done.

Morsel Road Repair Kit will not rut, ravel or shove in the repaired area.

Morsel Road Repair Kit requires no heating

Morsel Road Repair Kit can be used to permanently patch when the surface temperatures are as low as -5° C or as high as 85°C.

Morsel Road Repair Kit is applied without special equipment or skilled personnel.

Morsel Road Repair Kit is for asphalt or concrete pavement repairs regardless of the weather condition.

Morsel Road Repair Kit will not shrink after it cures.

Morsel Road Repair Kit remains stable in unconfined repair area; while other repair products have to be within the pothole

Morsel Road Repair Kit is a rapid curing repair product.

Morsel Road Repair Kit Has even greater compressive strength then the parental concrete.

Easy to Use “Mix N Pour”

First, sweep the repair area to remove any loose debris, then thoroughly compact the area. A wet surface will not affect the adhesion of **Morsel Road Repair Kit**

Our product containers are easy to open; just strip the tear tab off, and remove the container lid.

Mix all three parts thoroughly and pour it.
